

## Firmware upgrade instructions

- 1) Please unzip all files from the .ZIP file to a location on your computer.
- 2) Go to this folder through your Windows Explorer.
- 3) Open the directories until you see multiple files
- 4) Copy these files to a new directory on your tablet.  
We suggest that you create a folder on the tablet with an easy name  
i.e. create the folder 'update' (without quotes) and copy all files to this folder.
- 5) Find and Edit the update.bat file on your tablet:

```
Set ANDROID_PRODUCT_OUT=X:\update\  
fastboot erase userdata  
fastboot flash recovery  
fastboot flash boot  
fastboot flash system  
fastboot flash splash logo.bmp
```

Please replace X by the drive letter that has been assigned to your tablet computer.

---

**Execute the update.bat file**
